

## EARLY EXPIRY OF MEN

J Hossain

Academician and Rights Activist

---

Early expiry of men in enormous situations on earth are real and nascent issues. This is the only writing of this nature which is a sole creation in this century. It is detestable, abhorrent to think about how men are treated by the present society. Men's rights are terribly ignored except some masculine contexts. This writing and its title must flabbergast many feminists, affiliates and toadies who in many aspects are ignorant cannot imagine in translating the fantasy into reality show. The comparisons between the sexes are sometimes drawn due to clarifying the facts which are having many overlaps. Many issues are silly looking and trifle matters in nature are presented here to show how the roles of men and women interact and have their consequences. The silence and dare devils attitudes of men to different happening lead them to utter meaninglessness. Women have crossed the limits of endurances and creation of nature due to indifferences of men towards women's fantasy lead. The sack of lies to female deeds and actions are rampant and pervasive. This planet is cultured, nurtured, civilized and built by the blood and sweat of men who created cities, mansions, palaces, high ways, wonders, foods, lands, weapons and ships without which the human lives are meaningless and dark. Background of the study suggests scenarios replete with atrocious happening to men and the roles of men are leading and entrepreneurial, and challenging ones. Men's life is full of actions and ventures while women's life is full of amenities, luxuries and comforts. If men stop work, producing foods, driving vehicles, moving mills, the earth must stop to run and it will turn to be a den or dessert. From the eve of earth creation, men are earning, producing, growing foods, fish, crops, and edible items which are mainly men made and men are still wetting in rains and burning in sun to support family means wife, children and relatives. Women sometimes are assisting men as additional supports for completion of work. The present world and society is so selfish, indifferent, self centered that no one cares about the health and wellbeing of men who are dying in thousands in all countries but these vary in the developed countries. It is essential to judge qualities of men who are sympathetic, generous, pious, noble, wise, industrious and thoughtful, as a result men endure all pains, pangs, and torture imposed by modern women and children. Many Women are kind, sympathetic, affectionate, amiable, polite but many of them are idle, emotional, avid, selfish, adulterous, shallow in thought, hypocritical and silly at the same time. Women have a natural performance as a miracle is their child birth for which they are extolled and very much required for. But in recent decades they seem to be oblivious about what they are created and deputized for. Women, children and disabled persons are treated in the same ways, as they are same in nature of work, fortitude, valence and intellect. However, men are expiring in early stages need to examine the issues of how men are dying.

There are contexts in work, family, education, laws, productions, forces, business, media, sex act, relations, politics and health matters which are real cases of facts that show men who are confronting with life ending threats, risks, challenges and perils. Many natures of work are not similar to other sorts of work or business. Majority trades work which are basic, fundamental levels seem to be tough and rough to be performed. The society faces many fake artificial norms and laws of democracy or human rights which make shields for female class who are misusing and abusing the references as females, mother, sister, wife, lover, and grandma. There are no single human rights group work for men worldwide, but thousands of right groups work for females and donations from UN funds, National funds, Rich men funds, Business funds, European funds, Charity funds cry for rights and privileges of women or girls. Education up to degree levels free for girls, legal fees for cases or law suits are free for women, quotas of jobs for women are ensured, health services for women are loaded. Parliaments' Seats as MP are reserved, UN agencies and some female rulers heavily interfere in administration, law and medias to evince their roles superiority and struggling hard to hold the domination goes in vain. This planet is made and built by men and all species are fed and clad by men who have nothings for them are worst regret, is a deplorable history for mankind. It appears as if men are born to sacrifice their lives only to serve women. It is now a phase to see every even trivial issues of problems to be faced by men. Though many problems are normal and ordinary but they finally cause complex and wider cases. There are nondescript discriminations which are modern and new in forms are shown and treated towards men and boys. All materials are built, nurtured and made by men and their blood construct this civilization of today but the history of mankind or society do not recognize men's pain publicly. The history shows record that 98% great prophets, saints, guru, rulers, scientists, writers, merchants, and prodigies, stuntmen, supermen are men. Women help men for/ with some fun, crutch and cradles that are all and all credits go onto men. Though feminist groups occupying the media arena are engaged in denying and conniving all the facts belong to men's rights.

The facts of different aspects are presented for understanding how the societies pass. Boys are deceived by their many mothers or sisters. Specially in western society women do not marry to have sex and they give birth to boys as bastards. Their fathers are not recognized but mothers lie to their children that their father do not support them with money and do not look after them, actually there are no any father in reality because mothers also do not know who was a real father among many men who had sex with that woman / mother. A man as a father or fathers is /are blamed by women and their children grow with hatred, and dislike for fathers in the west. Mothers are highly adored and honored by their boys and daughters. Fathers in Asian countries and African countries excepts some cases are also less loved by their children because mothers always care for children's needs, foods, and wears though the costs come from fathers' pockets. Without father's earnings, those families or members can not live for a day

is forgotten by those who think about mothers are all sources of life. A family is a bond of relations and peace which are no more in practice in many courtiers due to the notions that women are not having freedom, the extinction of family ties fetch all kinds of social disorders, cruelty, insecurity for women, women are exposed to dangers of destitutions and prostitutions. Groups of feminists' followers are responsible for all these chaos in society at large. Though men are slowly liberated from the burden and load of women's expenses of livelihood as women claim their independence, men lose the foundation of family bondage. Men and women have their relations based on mainly sex acts and money, men are still losers, they invest money to buy sex even if it is a love relation, men spend huge amount of money to satisfy a woman to be a lover or husband even. It is not a matter of surprise that a man or husband squanders a large amount of money of his earning for buying wife's cosmetics, lipsticks, dress, ornaments, and other luxuries. Availability of money are not matter for women who by any means want to quell their desires of any demand. Ultimately men are under pressures of extra money which cause some sorts of health pressures, heart attack, or other diseases. Men also lose their money, semen, and stamina, once they mean both men and women taste of copulation, though women need the same taste or demands. Men also face terrible consequences out of uneven relations in status issues. Thousands of institutions in the western countries offer programs like Masters degree and PhD are open to women /girls but boys do not have easy access to those courses of study in institutions in the western countries. Influences on feminists policies from the west spread around the globe. Men class do not consider trifle issues like own rights, media coverage, talking shallow ideas, show off, being busy with profession and work, have no gossip time while women have all idle time for all those own privileges and advantages. Women use these time for their own rights and exploit men's scopes and innocence.

The whole world seems to be adverse against males. Men are trapped and chained by the belief that the continuum which holds the ideas women can do all things like men but in reality these are opposite, men do support women, feed women, shelter them, help them, care about the safety, protect them from the beasts, and save them from the wrath of nature like disaster, cyclone, and earth quacks. It is very important to analyze all facets of gender issues and their influential impacts on social stability. There are societies where life styles vary from persons to persons and their belief or attitudes. All societies in general confront with the similar crisis that are men made solution or problems. Men's roles and functions are invincibly apparent to be the superior to any others. When they consume the outputs, the portions are very scanty. They sacrifice for building the society but the recognition are not hung on issues of the rights which are shared by mainly the female group without much sacrifices. Many youth whose 95% are boys who are aged 20 to 25 join forces for career build up but in various countries defense departments show that those boys 30% die in mid level of age and 40% of men suffer from deadly diseases and disabilities due to their services. Orphan / suppressed boys in the

developing countries who are nearly 20% face utter penury in their lives, they wander in their career without any proper guidance, care, life values and well health, their fragile careers very soon collapse and they sooner or later join terrorism gangs, robbery and some of them die early due to ill deals. Health care systems in developing countries are focused on only women health in recent decades. Men's health need also the same cares or medicare are not known to the administrators of the countries and the social welfare groups. Many many hospitals or health care centres grow with the name of women's, mother's, child's, girl's hospitals mainly. The priority to women's health care systems have made the conventional routine matters as universal rules that men do not need health care who can die, suffer and bear agony. Social welfare department in the countries is also one eyed department which never consider the welfare systems for men, though a few elderly homes are made as samples but women are prioritized for facilities.

Men are dare devils who consider themselves as superior to women and men do not care about women's tactics, hypocrisy, volatile traits, unity among women folks, shrewd shelter under laws, admin wings, media favour in all societies, and sense of being weak and innocent which are main weapons to have passages of domination and power. Women are direct threat to men's lives in external environments. They are some groups create all sorts of discriminations, social classes of opportunists, they ultimately deprive men's rights and due attainments in many resources for men's smooth style of life are subdued. Women claim and have much undue facilities and favour are unfair.

Legal systems in many countries favor women and free services for women to lodge cases against men are open and encouraged. Women are welcomed by law departments to sue men without due and right causes. The men are always exploited and oppressed by the systems of human rights, democracy and women health care, and equal rights issues are all trashes. Law legally forces men to pass through many hassles and life long troubles, once men are involved in cases or law suits with women. Law systems deprive boys of their rights and fair means. Though nearly 10% men commit serious crimes and but innocent 40% men or boys are accused of various forms of crimes which are sheer propaganda as terrorists, rapists, killers, extremists who are victimized by the whim, ignorance, wrath, indifferences, greed and power holders of the society. Women also commit crimes though these are minor in nature but these become grave in future and destroy the base of family and men's lives too. Women are hugely in spying acts and smuggling. Many other crimes in modern times are rampant. Old men do not get elderly pay while old women get more or less in many countries. Old age is very critical for all men and women but men face more pressures of age than women because men bore serious burden / laden tasks without stop in life. The sexual harassments perpetrated by women mean nothings, medias report in America that many adult women as teachers have sexual relations and rape teen boys. Those women escape law suits without severe trial. Discriminations against

boys in sections and parts of life are badly displayed and treated. Women's inabilities, incapability for many work skills and performances make women lag behind men but they keep on saying that they are discriminated, they do not admit their inabilities for which they suffer for having equal scopes in career. All businesses, invention, discovery, building creation, and scientific innovation in knowledge are all made and created by men from the inception of the world civilization. Women do not feel ashamed rather they claim undue rights, rather men are supporting them for all sides, facets, shelters and feeding them like children.

Industrial work which are many in natures including mine, digging, sea bottom, mountains work, construction work, building work, fishing, farming, agriculture, driving, cooking in restaurants, highways repairs, engineering technicians, plant worker, chemical plants work, sales, vendors, forces/soldiers, steel factory labor, food making factory work and all reality show where 95% men work and they die as unnatural death in their mid age of 40% men. Sometimes some of men get some refund after their death though, they cannot enjoy anything. When men become 40 years old, they suffer from malnutrition, balanced foods, other supports which slowly draw them to the point of death. The work in plants are also very dangerous and risky, people are victimized by many sorts of hazards at work places, Machineries, materials loads, delivery work, pitching work, brick fields work are not easy to handle. Building bridges are other kinds of dangerous tasks are performed by youth or men. many men or youth die and are killed while they go fishing in the ocean or sea, many of them do not return home, these are regular scenario. Accidents, mishaps and burning occur while fire services men serve in places. Fire service needs strong, stalwart men to confront with invincible flame of fires occur in places. Some Women work in this service but the output is very meager.

Farm and agricultural work are not easeful or comfortable; these are many in natures, which are tiring, weary and exhaustive to be done. Stamina and strength are prior to setting minds and engaging in the work. Life styles for farmers are very plain and modest who are deprived of many modern amenities and demands of society. Men here burn in sun and drench in rain, struck by storm while they work. They do not stop their work as the food for their family must be got from this wages for work. They are not born as farmers but fate makes them so, are unaware of health issues, become ill or disabled due to lacks of foods, medicines and final stage is demise in early life. Though these work vary from society to society but the similar hardship is seen everywhere.

Cooking in household are not painful as those in restaurants and Hotels where culinary jobs are much painful and agonizing for work at a stretch of years. Cooks and chefs or kitchens workers / foods makers are mainly men who lead this industry as a catering field. The tasks in this area are risky and health concerning matter. Some women work there in front side as receptionists or cashiers or customer cares. The western countries have preventive measures though, the nature

of work are not always quelling mental stress. Hazards and risk in this work are not less than in those of high risks.

Stress for meeting the family demands on men regularly are very suffocating specially for many poor men. 60% poor people in many countries get on similar crisis of food provision for members of family. They work on daily basis, if they earn, they eat with children or starve and pass days without meals. Some women try to help their husbands and some other women without compromise demands their foods, dress, cosmetics, whatever happen to their husbands. Nearly 30% men suffer from heart disease like blocks in their hearts due to high pressure of tension to earn the daily basis food expenses. Some of them survive heart attack and some of them die instantly leaving many members of family in the atrocious nature of work pressures. Work are not matters of fun or joys which reality based hard tasks. Work at home which are done by women are enjoyable and loose in performances have no accountabilities. Those work are mainly family work are cushy and refreshing ones. Family responsibilities are unending tasks for 90% men in more or less all countries. Women get supports from all surroundings but men face cruel reality in environments. Once a boy starts to earn money they are running a grinding machine to support their families, they forget about their education, learning, promotion of work, meeting daily square meals are their prime focus. There is no scope for caring health issues or cannot go for treatment owing to poverty. They strive for survival of the daily costs of foods for family members who helplessly look forward to his returning home and cooking foods will be commenced. Small boys like 6 years old work at restaurants, on footpaths, workshops, tea shops, farms, fields, rivers, hills and canals for earning some money for supporting families. Their lives and career end up in dark alley.

The laws and societies claim that women are equal with men, when men work in odd situations, women are not there, women like medieval eras are sold for money which are taken as dowry or security money in many countries. In Arab countries women claim so much money when they marry to men, that men can not pay those amount, as a result men can not marry in normal stage of life. This is a sheer maniac system of religious and civil rules which devastate normal human demands. How do women claim to be equal once they are sold as products or a piece of flesh for consumption and also demands security money from husbands. Men when manage a family, men are over stressed and burdened by their family and wife mainly whose claim for cosmetics, dress, ornaments and luxuries cripple men, some men also commit suicide being pressurized by the financial poverty. On the other hand, women have free costs for suing men in court for nothing means trifle issues. Ultimately men are driven abnormal being under all sorts of mental tortures and finally fall ill and at the end expiry for life awaits them.

Soldiers who join combats or wars have no guarantee for life, many die without reasons and basis. Wars in countries, battles in regions, fights between races and casts, groups, are regular contexts which are led and performed by youth boys/ men alone. They are injured, wounded

and killed. The dictatorships and tyrant governments run the country with no mercy and they cleanse the innocent only men or boys who are opposite parties. Besides forces like police, CID, Army also kill people whimsically or irrationally as they possess the cheaper weapons and power. Who are law makers? Who cares about the death of poor people? However many innocent people like 20% among all in jails convicts die or are killed / disabled behind the bars. Those people have no money, nor have guardians to protect them from all those devils. Many information do not come to public eyes and the medias have prejudices against some people of groups or races, casts, males who are without any consideration on safety or security matters vapor or elapse in air. All happening of cruelty to men are natural because men are facing and performing all actions for protecting and saving the societies in this planet. Women repute and deal with some situations which are mainly female issues only. Men who are forces or soldiers are 95% who are mainly and largely die for services. Other men who die in early life have various causes and bases which come from many facets have enormous variables for decisions.

Work in transportations as drivers are another risky and threatening occupation which kill many people in early stages of life. Goods and delivery vehicles drivers are very hard working people who have no rest and comforts in work for days. The countries like Bangladesh or third world countries have no rules for driving well. There are thousands of accidents of killing others and own self happen every day. The drivers endanger their own lives, work day and nights for survival. Pilots or Ship master in sea are not new or pleasant for long time. They are all men driven. These jobs involve high risks for accidents or catastrophe happening and kill men. These men do not see their family members for a week or two months at a stretch.

There is nothing more atrocious than financial poverty and penury which are undergone and perceived by only men. The laws and religious norms and rules prescribe that men marry women and men then bear all her expenses during life times look insane. Though in western countries these are less, slight in treatment, they still follow the financial dependency on men and their earning. The western countries allow sharing the costs in family but men as husbands always are liable to looking after their wives and children more. Women bear expenses in 10% families who are in some societies but generally they do not do so countries. The western countries women curb the costs in sections of families but the government carries most burdens as their husbands are not present, known, or fixed. Men's earning mean great significances because they save lives of their families but women's earning mean increasing fantasy and luxury for themselves. Women contribute to family needs very scanty like 10% women do really in real senses though this rate in western societies go up to 30%.

Awareness of death and life is not very apparent to many ignorant 40% people in countries around the world. They work in natural ways as their health allows performing the tasks. Education or learning are lacking in them seriously. they have guardians to guide them against all odds, which one day become a threat to survival. There are huge variables in sorts of

diseases , some are light, some are grave in nature but they could not identify the degrees of significance how serious a problem of disease can be in the near future. Men's health advice and consultation are not available as women have, health centers for women are available in every street of a locality. Men normally consider health matters lightly. Those poor and ignorant people are suddenly expired due to the lack of facilities and ideas or awareness .

Social services, trends and beliefs in men's issues are very frail and uncared for. People do not think about men who may fall ill, they may face crisis, and so boys and then men grow naturally without special protection or support. The social leaders do not feel that men's problems are real problems. The lacks of serious consideration on diverse contexts of events or happening cause havocs in men's lives . The blind obsession of medias, social groups, laws, with only women's focus and demands make the social conditions partly imbalanced and biased. Men's rights and roles are not clearly presented before the public platforms. The State roles are also seriously nil in men's rights. No right groups talk about men's problems . When there is a problem of men's health it is his personal case or deal but when it is a women's health problem it is a State issue to be dealt with. The discrimination against boys or men rights are newly posing a grave threat to peace and stability in many countries. Governments in countries are responsible for neglecting and ignoring the proper dealing with men's health or life or death issues. Men are involved in sacrificing their lives for only protecting women as a wife, sister, mother, lover and nurse. Men get nothing instead of life long struggles and support for women who only beget some children and sometimes they care for those children and sometimes do not as they are prone to holding beauty, glamour, hunting suitors or paramours.

There are huge problems if profession or occupation based problems for men are presented in this writing. The hardest and toughest roles for performing tasks are men's roles whose tasks are saving and managing the productivity and productions in almost all industries. The industrial roles or welfare approach to men's well being are less applied when men work but women's issues are only prioritized . The equality for incentives is always raised but tasks performance is not compared or accounted for according to the roles for particular job. The preference to working for riskless jobs are chosen by women while men are made for risky roles and pushed forward to the point of accidents or mishaps which cause injuries or disability in life for men. There are no equal percentage in working at all trades which are really dangerous and perilous. Equal right or rewards come from incredible performance and deed , talk alone can not prove to be equal and superior. Holding a bossy job is not a rank based measurement for a real assessment on merits and intelligence. The tasks of productions for foods, materials, chemicals, automobiles, electronics, and creative roles are real heroic jobs which are claimed by men alone in majority cases. Those men are not remembered by the society though they dedicated their lives to well cause of the world civilization and human survival.

There are some nations who are developing and they have social conditions that make 15% men or boys join in occupations like pilfering, theft, hijacking, extortion, abducting, terrorizing, assassin and mercenary roles who are earning money to support their families and have no certainty when they may expire due to attacks by the legal or opposite forces. These scenarios are variables. The scope for joining these roles are unexpected but due to social misguides and govt negligence towards men and boys, these situations have arisen. Education and fair treatments are not provided for boys. New form of discrimination against boys worsens on and on.

A man as father, husband, brother, lover has always responsibility for supporting the younger and women. When a man or youth boy remains unemployed, he then gets frustrated, addicted, become terrorists, robbers, thugs, or killers. This is very natural process for a man to pass the life. The society do not very much consider the facts because those who rule the nations in some races particularly are women cannot understand the ruling, administration, those women are also dictated and directed by their Junior or male colleagues. Many of those women have no education or half educated will never understand the complexity of lives. They become rulers or ministers by dint of their fathers, brothers, and husbands who die and inherit daughters or sisters or wife to hold the power. The cases in Bangladesh and Britain are similar. This practice of inheritance of dynasty in many countries causes misery to their people due to inability, ignorance and arrogance of an inheritor who is mainly a female fetch disaster to the whole nation or world at large. Bangladesh, Srilanka, India, Argentina, Canada, UK, Spain are glaring examples of this nature. Unemployment rises in many countries due to discriminations against boys, which are very modern in approach are evaded from the eyes of public to treat the male society. Those men or boys face sever crisis not only mentally but physically and socially to live a fair life. The horrors of poverty devour those men and the ultimate fate is a passage to hell.

Men are treated by social forces in a realistic general ways while women are cared, pampered, supported, fondled, blindly respected by people. The trends and beliefs of ignorant people are obsessed with women's weakness, beauty, glamour, and affection, love or sex above all. The easy scopes of women for blackmailing men are manipulated by women while men are also victimized and tortured in many situations. Young boys or men are dangerously conjured and spelt by women who tempt and seduce them for love or flirtation which lead boys to deviate and distract from right path or study or values in life. Destruction in men's life then is inevitable.

The roles of medias, press, law, NGOs, UN agencies, and feminist groups are responsible for this chaotic war struck world. The wars in the Middle East are never forgotten in history. The reference to this war is obvious as it is so destructive that millions of men or boys died, killed in the wars. 95% men are victims who are willy nilly or by force join and are discriminated to

join the forces and made to fight against the foes without real interest. Silent wars also run in countries like Pakistan, India, African countries, Bangladesh where Forces or opposition groups continuously intentionally killed, abducted, thousands of men and young boys who are either suspects or convicts who are innocent are members of opposition parties. They are killed in the name of cross fires or assassinated. Those killings and death are unaccounted for because they are in power as god fathers. Thousands are retained in jails without any trials or judgments. These people are in position which is not normal to function in life. The death rates in ages and stages of men are enormous, the records are noticed by the public in many contexts. The rendition / torture cells around the globe or in countries are also evidences that men are destroyed by multiple ruses and tactics.

Migration from a country to another one or mainly to the West is common, the systems followed by 80% men or young boys who cannot be successful in reaching the destinations. Average 15% those migration seekers are lost in the journeys. Three destinations are the major death traps are North America entry, Australia entry and Europe entry. Some of them can reach the places but their anxiety, tension and mental pressures for settling or finding jobs are incessant and they thus become sick or fall ill. They cannot go far, can not live long, very shortly embrace a breath of expiry. A mission for caring, supporting, protecting a family or community depends on men in all societies. Men undertake all ventures under any danger of death or wound for saving family members and then the women who are their wives, lovers, mothers and sisters.

In the final phase, it is concluded that the early expiry of men is obviously a logical, reasonable and rational concept for acceptance under the contexts of reality. The various facets of the issue have been analyzed systematically. Basing on professional and occupational roles and responsibilities men are seen in contexts which are clarified with logical references, natural causes and universal appeal. The present and past conditions of men's health and their supports for improvements or protection are pathetically nil. Women's roles are also considered on this issue as they are closely intertwined with men in family, work, business and recreations. Many governments offices and departments in countries openly discriminate against boys who grow as men sooner for resources but they then are victimized. Medias, NGOs, laws and govt officials in countries promote only women or girl's rights while they do not consider anything for men's rights and needs. The attitudes and motivation for developing all those supports for men are misguided and misinterpreted by the related agencies and authorities. All parties involved in the process of health cares or wellbeing are mainly biased and prejudiced being influenced by the donor agencies, ruling class, and welfares bodies who are mainly feminist groups. New trends towards women in supporting them are always stressed on, women are prioritized to any sort of consumption in society. Women are playing double standards as frail forces demand more supports and resources and on the contrary, as equal beings demand unfit or fit scopes or

opportunity which are provided for them more than due ones. Men undergo both mental and physical agony and tortures for filling gaps of services which are lacked in by women in work or professions. Men ultimately gain less or nothing in life term services. Sacrifices, risky work, poverty, financial burden, and deprivation of their due rights and attainments lead them to early expiry in life.
